#### **Question: 8**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a reference computer for a new UEFI-based deployment image of the 64-bit version of Windows 10. The reference computer has two physical hard disk drives.

You need to configure a partition on Disk 0 to support a recovery partition.

Solution: You create a primary partition of 250 MB that uses the NTFS file system.

Does this meet the goal?

A. Yes

B. No

Answer: B
Explanation: This partition must be at least 300 MB References: https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/configure-uefigpt-based-hard-drive-partitions
Question: 9
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.  After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.  You are configuring a reference computer for a new UEFI-based deployment image of the 64-bit version of Windows 10. The reference computer has two physical hard disk drives.  You need to configure a partition on Disk 0 to support a recovery partition.  Solution: You create an EFI system partition of 150 MB that uses the NTFS file system.  Does this meet the goal?
A. Yes B. No
Answer: B
Explanation: References: https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/configure-uefigpt-based-hard-drive-partitions
Question: 10
You plan to create an image of Windows 10 that contains a push-button reset solution. The solution will have custom settings for each edition of Windows 10. You need to prepare the push-button reset solution. What should you include in the solution?
<ul> <li>A. an unattended file and a bare metal recovery configuration</li> <li>B. an unattended file and extensibility scripts</li> <li>C. extensibility scripts and system restore points</li> <li>D. a bare metal recovery configuration and Scanstate packages</li> </ul>
Answer: B
Explanation: References:

https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-a-script-to-push-button-reset-features
